

AI AND EDUCATION

AI AND EDUCATION

AI in Education has been

a

HOTTOPIC

as of late.

**Lots of people young and old
distrust it, but why?**

DOES CHATGBT = CHEATING?

DEEPER LOOK

About 51% of students believe using AI is a form of cheating; 1/5 of that group still uses it anyway.

DEEPER LOOK (CONT)

Why.

Proposed answers are:

- 1) Ease of access: it is now accessible on your browser, anywhere. It has been seamlessly integrated**
- 2) Human nature: if there is an easier way? Take it!**

CALL TO ACTION

1) Educate yourself! A better understanding of these systems and their functions contributes to a better relationship with these programs.

2) Regulation on the production and usage of these programs.

3) Algorithm detection will improve to catch abuse of these algorithms.

TAKEAWAY?

AI's development has been impressive and its impact on education cannot be denied.

Regulating, detecting and refining our interactions with AI through the lens of education will help improve our relationship as we move forward.
